

## BEFORE & AFTER REPAIRS

## TRUST THE EXPERTS.

*Dr. Charles Soparkar is a highly experienced plastic surgeon specializing in cosmetic and reconstructive surgery in the eye region.*

*The eyes are the focus of the face, but the ears frame the face. You've trusted us with your eyes, now you can trust us with your earlobes.*

*Learn more about this added service that Plastic Eye Surgery Associates, PLLC offers.*

EAR PIERCING ALSO AVAILABLE

Houston, TX 77098

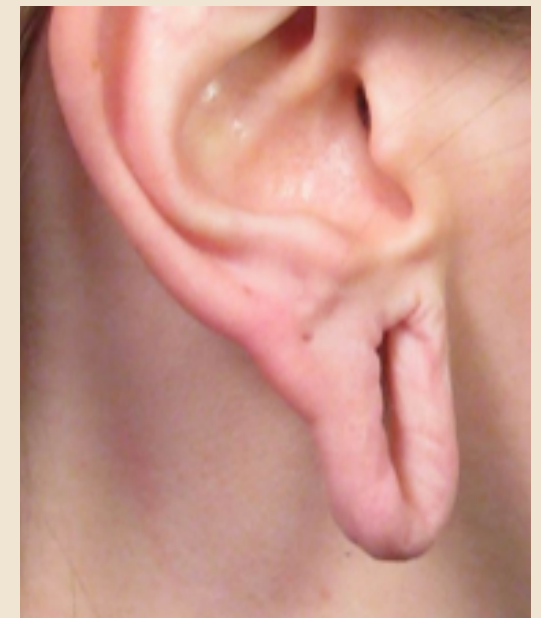

## STRETCHED EARLOBES?

*Aged ears bother a lot of women. This may be due to prolonged and excessive use of heavy earrings that stretch the earlobes overtime. Revive your earlobes with a safe procedure to remodel the edges, while preventing unsightly scar.*

## RIPPED?

*Ripped piercing holes or tunneled earlobes have overstretched and saggy skin . People who wore gauges decide at some point to get rid of them and have their earlobes fixed.*

## SPLIT AND TORN?

*When your little one pulled hard at your earrings, you ended up with an unsightly tear or split! Repair is possible, and in a couple of months, you can be wearing earrings again.*
